

## DEVICES WITH TETHERED POWER AND COMMUNICATION LINK

### JANUS X4/X8

The possibility of double utilization ensures a static use for up to 8 hours, as well as all the advantages of the X4 and X8 multicopters with battery power only. Switching between the two ways of operation is possible within minutes, so in one system two special capabilities are available.

### ELISTAIR SAFE-T/LIGH-T

We have been the Hungarian distributor for Elistair, a French tethered power and communications link professional equipment for several years.

We provide all training, maintenance and repair support needed for the operation of these devices.

## CONTACT US

If you have any inquiries about our products and/or services, or if you are looking for a technical partner for a completely unique, personalized solution devised for you, please get in touch with our colleagues.

We hope to have You and your company amongst our customers and partners soon!
